

GLOBAL CREDIT STRATEGIES FUND

Investment Objective & Policy

SphereInvest Global Credit Strategies UCITS (“SIGCSF”) is a dynamically traded, unconstrained and opportunistic fixed income fund, which invests in a globally diversified, high conviction portfolio of corporate bonds and, at times, short-duration US Treasuries. We invest using three tools: fundamentals for credit selection; macroeconomics for market timing; and liquidity management, through cash and risk-free equivalents, for capital preservation.

Key Risks

The value of shares in the UCITS and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations.

The UCITS seeks to achieve its investment objective by principally investing in a diversified portfolio of publicly-issued bonds. The UCITS may utilise financial derivative instruments for hedging, efficient portfolio management and/or investment purposes.

Bonds or other debt securities involve credit risk represented by the possibility of default by the issuer. In the event that any issuer experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the Net Asset Value per Share of the UCITS.

Investment instruments have historically been subject to price movements that may occur due to market or issue-specific factors. As a result, the performance of the UCITS can fluctuate over time.

Other significant risks include: liquidity risk and operational risk. For full details of the risks applicable to the UCITS, please refer to the 'Risk Factors' sections in the current Prospectus of SphereInvest Global UCITS ICAV and the Offering Supplement of the UCITS sub-fund - SphereInvest Global Credit Strategies Fund.
